INVITATION to the Jubiliary Workshop

Reducing Pollution from Transport – actual challenges and developments

30 Years AFHB, 20 Years Collaboration BAFU / AFHB,
3. April 2009, Aula, BFH TI Biel, Quellgasse 21

Dear Colleagues, dear Friends, Ladies and Gentlemen,

The activities of the Laboratory for Exhaust Emission Control (AFHB) of the Bern University of Applied Sciences Technics & Informatics (BFH-TI), Biel CH started on April 2nd, 1979 under the direction of Prof. Paul Wittwer.

AFHB was founded as an “Environmental Laboratory of the Automotive Division” together with the Federal Office of Roads (ASTRA).

Except of great contributions to the teaching activities, AFHB could work for authorities and for industry supplying research and service works.

In the BFH, AFHB developed and keeps in service the ICE-Laboratories.

Together with Swiss Federal Laboratories for Testing Materials (EMPA) AFHB contributed to several ideas about environmental consciousness in transport and about rational use of energy. AFHB represents the Swiss Networks, which work on these topics on the national and international stage.

For the 30th anniversary, we organized an international jubilee Workshop. Please find attached the technical program. We would be honoured to welcome you on this occasion.

Registration until March 13th, 2009, see attached form.

Participation fee including: participation, documentation, catering during the coffee and lunch break.
(With support of the Federal Office for Environment).

regular participants: CHF 50.-
students: CHF 10.-
honorary guests & presenters: free
payment cash at entrance

Language: English

Organisation: Prof. Jan Czerwinski, Mrs. Véronique Barthe,
Automotive Division
